Listing of Patent Claims

1-19: (Canceled)

20. (Currently amended) The transmission according to claim [[17]] 33, wherein the second toothed gear comes into engagement after a specific elastic deformation of the first toothed gear.

21-27 (Canceled)

28. (Currently amended) The transmission according to claim [[27]] 33, wherein the first toothed gear is offset radially from the second toothed gear by a positive profile displacement.

29-31 (Canceled)

32. (Currently amended) The transmission according to claim [[15]] 35, wherein the first and the second planetary wheels have a radially non-rigid suspension or support bearing.

33. (New) A transmission for a steering unit of a vehicle, comprising at least a first toothed gear and a second toothed gear arranged coaxially on a common planetary carrier, wherein the first toothed gear has a softer surface than the second toothed gear.

34. (New) The transmission according to claim 33, wherein the toothed surface of the first toothed gear is made of plastic and the second toothed gear consists of metal.

35. (New) The transmission according to claim 33, wherein the transmission is a planetary transmission with at least one sun wheel and at least one planetary wheel and the first and second toothed gears are part of the same planetary wheel.
